DETAILED ACTION

Election/Restrictions

Claims 1,2,6-10 and 16-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1² and 6²-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: first active with the reflectors and second active layer with the reflectors.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: first lower reflector, active layer and upper reflector no relationship established only a list of elements.

Art Unit: 2828

Second lower reflector, active layer and upper reflector no relationship established only a list of elements.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,6-10 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Paoli (PN 5,699,375).

In the abstract Paoli describes a multiple wavelength surface-emitting laser with neighboring cavities (130,140) having first and second distributed Bragg reflectors (DBR) (104,122) and an active region (108), where the DBR provide reflection to obtain a dual wavelength laser system and all elements of the laser system having a common substrate (102); each neighboring cavity having a pair of upper electrodes (160,162) and lower electrode (194), as shown in figure1.

FIG. 1

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over figure 1 of applicant's admitted prior art.

Current confinement sections or layers are well-known in the laser art and forming these sections or layers within the upper reflector is well-known as shown in figure 1 of applicant's cited prior art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Armando Rodriguez whose telephone number is (703) 308-6218. The examiner can normally be reached on 10-hour day / M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Ip can be reached on (703) 308-3098.
